# Case Studies For Health Information Management

# Synopsis

Created specifically for students of Health Information Management and Health Information Technology, this worktext helps bridge the gap between knowledge gained through formal instruction and real-world, on-the-job application. This versatile worktext features 240 case studies with questions and exercises for each case that require you to draw on critical thinking, problem solving, and decision making skills, facilitating the transition from studying theory to analyzing and applying what you have learned. Now updated and expanded, the second edition features the latest RHIA and RHIT domains and competencies, so you can prepare effectively for certification. In addition, new online learning resources provide convenient access to additional web content, online forms, and spreadsheets to complement the cases.

# Book Information

Paperback: 448 pages

Publisher: Cengage Learning; 2 edition (June 11, 2013)

Language: English

# Customer Reviews

"I would highly recommend this text to my fellow faculty and all other HIM colleagues. I would encourage them to adopt this text because of the positive results I see in student accomplishment during the exercises. The wide range of scenarios and activities build student self-confidence in areas where they have had little or no experience. Most of all, the students enjoy working on the case studies as they put their HIM knowledge into practice.""I love this book, I love the variety of topics all under the same cover- students can buy it once and use it multiple times."

Patricia Schnering is an adjunct instructor of HIM at St. Petersburg College, and serves on its

advisory board. In addition to experience as an HIM supervisor and consultant, she is the founder and owner of PRG Publishing Inc., where she published the first Professional Review Guides. Ms. Schnering has served as president of GCHIMA and on FHIMA's board of directors, where she twice received the FHIMA Literary Award. She is also a member of AHIMA and the Assembly on Education (AOE). In addition to a B.S.in business administration from the University of South Florida, she is a graduate of the health information management program at St. Petersburg College, and holds both CCS and RHIA certifications.Nanette Sayles, PhD, is an Associate Professor in the Health Information Management program at East Central College in Union, Missouri. Her wide range of HIM experience includes work in hospitals, consulting, system development and implementation, and education, eventually earning her the American Health Information Management Association Triumph Educator Award. She earned her undergraduate degree in Medical Record Administration from at the University of Alabama at Birmingham, where she later received Masters Degrees in both Health Information Management and Public Administration. Nanette completed her doctorate in Adult Education at the University of Georgia.Charlotte McCuen, MS, RHIA, is an adjunct faculty member of Health Information Management at the University of Cincinnati. Her three decades of professional experience in HIM include serving as Associate Professor and Clinical Coordinator for the HIM undergraduate degree programs at Macon State College in Macon, Georgia, as well as HIM Director for an acute care hospital and a state psychiatric and forensic acute care hospital. Her consulting practice extends to long-term care facilities, a behavioral health hospital, physician offices, and renal dialysis centers. Charlotte received her BS degree in Medical Record Administration from the Medical College of Georgia, and her MS in Health Care Policy and Administration from Mercer University. She continues to volunteer with AHIMA, as well as the Georgia Health Information Management Association (GHIMA), where she received the Mentor Award and recently served as president.

Some of the case studies are pointless. This is the new updated version, and the publisher did not even take the time to update website links or other important information needed to complete the cases. There are some changes to page numbers and case numbers so you have to buy this edition, not the old one, to make sure you do the correct case for class.

I'm glad that I got the digital version of this book because it makes doing my case studies so much easier. I have a dual monitor set up so I keep the case studies book up on one monitor and then work on them on the other monitor.Plus, the ebook is around half the cost of the cheapest used

physical copy that I could find.

My adult daughter loved it but I would prefer an actual book with paper pages. I like that I can get to it from my pc, tablet or phone.Thank you,ann onymous

some of the senarios do not make sense ...even to folks who have passed exams and work in the field

The book does not contain the code necesssry to complete my course. I contacted CengageBrain and my professor still not able to obtain the code

below average college textbook; confusing instructions on cases. Not very explanatory - left to the professor on most of the cases to give details of what she expected the exercise should illustrate

Real world case studies, prove to be great for class room and online discussion. I thought that this resource was very well written and definitely had the HIM student in mind.

Excellent I received my book in 2 days
