The Biophysical Chemistry Of Nucleic Acids And Proteins

Synopsis

Who will buy this book? University students and scientists in the biological sciences. DNA, RNA and proteins are undoubtedly the most important biological molecules. Being large macromolecules, their physical, chemical and biological properties can differ dramatically from those of the monomers from which they are made. Described here are their primary, secondary, tertiary and quaternary structures; their evolutionary origins; their unfolding and refolding; their chemical synthesis and manipulation; their physical interactions with other molecules, which often result in catalysis of chemical reactions in one or both of them; and the various ways in which the catalytic activities of enzymes are controlled and regulated. Colour is used liberally throughout the volume to enhance the many illustrations.

Book Information

Paperback: 816 pages

Publisher: Helvetian Press (June 10, 2010)

Language: English

ISBN-10: 0956478115

ISBN-13: 978-0956478115

Product Dimensions: 8.2 x 1.4 x 10.9 inches

Shipping Weight: 5 pounds (View shipping rates and policies)

Average Customer Review: Be the first to review this item

Best Sellers Rank: #934,892 in Books (See Top 100 in Books) #80 in Books > Science & Math >

Chemistry > Crystallography #206 in Books > Science & Math > Biological Sciences > Biophysics

#244 in Books > Computers & Technology > Computer Science > Bioinformatics

Customer Reviews

Thomas E. Creighton is retired, after a career in academia at Caltech, Stanford and Yale Universities, the MRC Laboratory of Molecular Biology at Cambridge, England, and the European Molecular Biology Laboratory at Heidelberg, Germany. He is the author of two editions of *Proteins: Structures and Molecular Properties* published by W. H. Freeman and has edited the four-volume *Encyclopedia of Molecular Biology* and the five-volume *Encyclopedia of Molecular Medicine* for Wiley-Interscience, two editions of *Protein Structure: A Practical Approach* and *Protein Function: A Practical Approach* for IRL Press at Oxford University Press, and the volume *Protein Folding* for W. H. Freeman.
