Customer Reviews

This is a very pretty book with nice illustrations, fun facts, and pictures organized into various "trails" by theme. There is a "sporty" trail w/ stadiums, a "foodie", a "historical", etc. Each trail has about 8 stopping points and a drawn path from point to point...but NO MAP of the actual trail! I had to go into Google Maps and save a map. I stopped after the first map I made. If you are looking for a book for your kids to learn more about Paris...this is nice, but we are leaving in 2 weeks and I have yet to find an actual guide book for kids that we like.

Our daughter (6 and a half) loved this book on our recent trip to Paris. The fun facts were fun for us grown-ups as well! It made a great read at bedtime as well as on trains, planes, and automobiles. A great way to engage kids in history and introduce them to a new land!

My eight-year-old devoured this before our trip to Paris! It was very accessible and made the city come alive for her. She liked it so much, I read it as well, and I was glad I did. There's a lot of useful information and fun trivia. I will look for these books before every trip with our kids.

I love this book and plan on taking it with me when I make my first ever trip to Paris this year. NOT just for kids!

Good to read before going. My 14 year old actually liked it but the 11 year old was not interested. A map would be a great help, however.

My daughter really likes this book (12 years old)

This book caught my eye on the "New Books" table at my local library. I thought it would be good for my nine year old as she is learning French and this looked like an interesting cultural book to complement her learning. I started flicking through some of the pages and found myself immersed in the streets of Paris discovering museums, bridges, cafés and even cemeteries! The book contains nineteen themed trails through Paris. Each trail has a number of stops with some information about each location. Some of the locations are well-known, such as the Eiffel Tower and Notre Dame Cathedral, while others are somewhat obscure, but all were

fascinating. These trails had every possible interest covered, from food journeys, sport, and art to romance, history and magic. The layout and content are superbly presented, with short bursts of texts, interspersed with plenty of photos and coloured illustrations throughout. There are also fact boxes and extra tidbits around the main text. I really liked the illustrations, which included the two kiddy guides, Marco and Amelia. You can spot this pair participating in various activities along the trails. All of the illustrations were bright, colourful and clear; some were quite funny too. I've never wanted to go to Paris as badly as I do right now! I would love to follow these trails and experience all of the incredible sights, sounds, smells and tastes I've discovered in Paris City Trails. It may be aimed at children, but I thoroughly enjoyed it. I highly recommend it for anyone planning to travel to Paris with children (and anyone just dreaming of it!) Paris City Trails is suitable for middle primary school students and up. There are currently two other titles available in the Lonely Planet Kids series; London City Trails and New York City Trails. I plan to read them as well and hopefully there will be more titles available in the future. I'd really like to see some for other major European cities.

Not usable on iPad, less on iPhone. Cannot enlarge images, and text appears larger only when double clicking on each paragraph.
