THE MATH FORUM @ Drexel (mathforum.org) is an award-winning Web site and one of the most popular online math resources for students and teachers. The Math Forum offers answers to all kinds of math questions, prepared by a team of math experts. It also keeps archives of previous questions and answers, hosts online communities, and posts several "problems of the week."

excellent condition

Wonderfully written and illustrated. This book helps those who are perhaps at sea reading from a standard text. The writing is very clear and more conversation than lecture. There are proofs of things if you are a concept person but there are also plain and easy to follow instructions if you're more of a rote learner. The examples are wonderful too.

Well written.

This book is "Excellent! It breaks down the information to grammar school level. What more can I say. One has to practice a lot of problems for it to Stick in your head." The same for the other book, "Dr. Math Gets You Ready for Algebra, which should be read First, and take notes [regardless of the fact that you now own the book, Take Notes]. Arivle L. Griffin

Super for understanding algebra. Teaches much better than the teacher in my son's school. A must have for young students.

excellent 5 stars

Notas good as I thought it would be.

Sorely Needed. Thanks.
