We bought this Atlas to help with our homeschooling geography for my 7 year old who is in 2nd grade. This Atlas is fantastic! It is detailed and informative, however not too overwhelming to tackle with a 2nd grader. The pictures are high quality, and there are plenty of fun and interesting facts about the states!

This Atlas is absolutely amazing. I first checked it out at our local library to have on hand as a home school mom for a study on the United States this year. Wow, my first grader and I just love it! Great map for each state, including the rivers and main cities. Then there's all the fun tidbits about each state, some history, and the state bird/tree on every page. After holding onto the library copy for over 3 weeks, I decided we needed a copy of our own! Great price on . Highly recommend it!

Awesome atlas. Very informative and just right amount of information to keep kids interested for that state. Cover is thick and can easily handle the wear and tear.

Awesome! Will be great for my Grandson's School this year!

I actually bought this for my 83 year old mom and 87 year old dad as a Christmas gift. They have kids and grand kids all over the place. So I marked where everyone is for them. It is a really nice atlas and I think they will like exploring since they don't travel much any more.

Looks nice but unfortunately did not arrive until after our 2 week road trip.

I bought this atlas for our homeschool geography curriculum and it does not disappoint. Filled with lots of fun facts that the kids look forward to reading and the traditional physical map set up is perfect.

We are using this along with our curriculum purchased from Confessions of a Homeschooler titled Road Trip USA. It's a very child friendly layout and easy for my kids to use independently .
