Zoologist Jim Kavanagh has made a career out of introducing novices to plants, animals, the sciences and world cultures. In addition to creating over 500 simplified nature guides, he has also

authored guides to languages, cities and outdoor skills. An avid traveler and backpacker, Kavanagh's path has taken him around the world to many remote destinations including the upper , Africa, Australia, and the Arctic Circle (and this is just the As). He is also the author of a series of state-specific guides to common species and natural attractions and a children's book on evolution.

Very odd selection of birds, some that are quite uncommon while leaving out others that are widespread including the purple finch and downy woodpecker. Some of the illustrations look very little like the birds depicted and without explanatory text it would be easy to misidentify birds. In addition, nearly half of the guide is taken up with waterbirds, several of which are extremely uncommon as well.

Have been spending time in Okoboji and this helps me to identify the birds that i see. Great and handy!

Perfect size to take with you on a walk, hike, etc. Love that it is laminated to protect it from the elements.

For the price I thought there should have been more to it. What was there was good! I wouldn't have bought it if I had seen it first.

Just right for a hike in the woods!

Handy book for a bird brain.

Used much

Not much for the price.
