It is more a starter kit for ophthalmology, has all the basics, but definitely needs to be supported with other textbooks, another drawback is: it is black-white not colored

recommended for medical students on aways and intro to ophtho for residents.

Unless you have these books around, you have no chance, not mention, that they are, for the most part, readable from cover to cover...

This book contains a lot of information that will be valuable in studying for my boards and beyond. Received in atimely fashion and in excellent condition.

Great product! Cuts vegetables like butter. send it to my teacher as a gift, arrive on time, I will recommend it to my friend. OK.
