Spectrum Understanding Fractions, Grade 3 (Spectrum Focus)

Synopsis

A strong home-to-school relationship helps kids see the whole picture when it comes to math, and with Spectrum(R) Focus: Understanding Fractions for grade 3 kids can spend a portion of time at home practicing converting fractions, comparing fractions, and more. Packed with explanations and comprehensive assessments, the Spectrum(R) Focus series is designed to help every child meet (and exceed) expectations by offering an in-depth learning experience. This standards-based workbook doesn't just prepare them for classroom success—it helps them make real-world connections by applying fractions to everyday scenarios.

Grade Level: 3 and up

Customer Reviews

Spectrum Focus provides specific support for the skills and standards that students are learning in today's classroom. A complete introduction to the topic teaches each skill through in-depth explanations and examples. Guided practice scaffolds learners as their understanding grows. Independent practice builds proficiency and fluency for each skill. Performance tasks challenge learners to apply knowledge and make real-world connections. A comprehensive assessment provides evidence of skill mastery. No matter your need, Spectrum is with you every step of the way.

This book is great for teaching fractions. It provides an excellent reference on fractions, and how

they work. They also give you a great start to formulate your own practice pages. The only downside I find is the size. I really wish they had more practice pages, but I feel this is a great intro for my son who is going into third grade. Just one of the many Spectrum products I really like.

This book contained a lot less content than I expected. It is fine as a supplement, but it does not stand work as a stand alone fractions teaching tool.

Quick shipping and great for helping with my homeschooling curriculum!

fine

There are far to few pages for what it costs. Not what I expected
