Collapse Of Burning Buildings: A Guide To Fireground Safety

Synopsis

Chief Vincent Dunn, a 42-year fire service veteran, has updated his best-selling book which examines the dangers of structural failure caused by fire. This is the second edition of the first textbook written to warn firefighters, company officers, and fire chiefs about exactly how structures collapse when destroyed by fire--and examines the subject of burning building collapse in great detail. More importantly, this book, unlike any other publication, instructs firefighters and fire officers in how to survive burning building collapse.

Customer Reviews

Vincent Dunn is Deputy Chief (Ret.), Fire Department of New York.

THE book on structural collapse. Chief Dunn knows more about building construction than contractors that build them. Make sure you get the updated edition that covers 9/11. Every firefighter should read this for their own safety- things highlighted about the integrity of structural members and what compromises them could have only been learned from experience and Chief Dunn has covered all of it.

Well written book!

Great Price, fast shipping.

Great, possibly life saving information. Short, to the point. I wish all required fire service books were written in the style of Chief Dunn! Thank you Chief!

Great book

its ok

Just a fantastic read with lots of useful information for the fireground.

Excellent reading
