1001 Inventions And Awesome Facts From Muslim Civilization: Official Children's Companion To The 1001 Inventions Exhibition (National Geographic Kids)

Synopsis

We often think that people from a thousand years ago were living in the Dark Ages. But from the 7th century onward in Muslim civilization there were amazing advances and inventions that still influence our everyday lives. People living in the Muslim world saw what the Egyptians, Chinese, Indians, Greek, and Romans had discovered and spent the next one thousand years adding new developments and ideas. Inventors created marvels like the elephant water clock, explorers drew detailed maps of the world, women made scientific breakthroughs and founded universities, architects built huge domes larger than anywhere else on earth, astronomers mapped the stars and so much more! This book takes the winning formula of facts, photos, and fun, and applies it to this companion book to the 1001 Inventions exhibit from the Foundation for Science, Technology, and Civilization. Each page is packed with information on this little-known history, but also shows how it still applies to our world today.

Book Information

Series: National Geographic Kids

Hardcover: 96 pages

Customer Reviews

“National Geographic has developed a book that's as packed with information as an encyclopedia but as much fun to read as a comic book” Readers interested in the value

Muslim civilizations have added to our global village will be hard-pressed to find a more stimulating introduction than this one. — Kirkus Reviews — “This heavily illustrated volume stands on its own as an accessible history of the golden era that spanned from the 7th to the 17th century. — Boston Sunday Globe.

NATIONAL GEOGRAPHIC is one of the world's leading nonfiction publishers, proudly supporting the work of scientists, explorers, photographers, and authors, as well as publishing a diverse list of books that celebrate the world and all that is in it. National Geographic Books creates and distributes print and digital works that inspire, entertain, teach, and give readers access to a world of discovery and possibility on a wide range of nonfiction subjects from animals to travel, cartography to history, fun facts to moving stories. A portion of all National Geographic proceeds is used to fund exploration, conservation, and education through ongoing contributions to the work of the National Geographic Society.

Gives a detailed look at the contributions of the muslim civilization. Great book for teachers and students from 6th grade and up who might have never thought of this civilization along with the Chinese and Roman civilizations often taught in schools. Allows perspective.

I had this on my coffee table and my guests loved looking through the book. Visually the information is laid out clearly with interesting details. I highly recommend this book to anyone who enjoys history or is just curious about Muslim Civilization.

Great introduction to discoveries made by Muslim scientists and explorers. The facts are presented in very short summaries, so I'm planning to use it as a segway for more research with my kids.

Advanced book - purchased for my three year old but will be way over his head - great graphics - lots of information - great for preteen age.

I bought this book for a child who is moving with his family to the Middle East so he might gain an understanding of that culture. This is a very interesting book with so many discoveries which I never realized originated from the Muslim Civilization. A great book for everyone to read to bring our worlds closer together!

This says its for kids, but I'd say great it's for everyone 10 and older.

This is a Great book. Interesting information. My 13 year old enjoyed learning about the different inventions by other Muslims. It Inspired him to be the next inventor.

The image layouts are choatic. Too many words thrown in a collage like fasion. Hard to follow along and not really a kid friendly or entertaining for that matter
