Building Strip-Planked Boats (International Marine-RMP)

Synopsis

The first comprehensive book on stripbuilding almost any type of small boat Strip-planking is a popular method of amateur boat construction, but until now there has never been a book that showed how to use it for more than one type of boat. Author Nick Schade presents complete plans for three boats of different types (canoe, kayak, and a dinghy) and shows you step-by-step how to build them. Written for all amateur builders, the book covers materials, tools, and safety issues.

Customer Reviews

Nick Schade runs Guillemot Kayaks, one of the best-known providers of plans and kits for strip-built kayaks. He has written feature articles for Sea Kayaker and other magazines.

I may not be giving this enough credit, after having watched several dvd instructionals and doing other reading, but I certainly would recommend to someone wanting to familiarize themselves with the process and have some brain candy as to the possibilities. Mr Schade knows his stuff...sure I will revisit the pages again.

I've built a kayak before and just wanted to know some different methods available to me. A very good book by the way.

Very detailed and complete. A great book for beginners as I am.

This book is one of the few readable resources of this type and is written in a concise and easily understood fashion. It is not only an invaluable resource for the beginner due to its method and tutorial driven style but also reaffirming and inspirational for the experienced woodworker looking for a new challenge. Nick Shade has a friendly writing style full of advice gleaned from years of experience, never descending into condescension. Enjoy reading this book even if you don't intend to build a boat.

good

Is there anything Nick does that's not worthy of a five star review? Sometimes the authors name says all you need to know.

great

Fantastic book for strip built techniques and processes. Nick is a master and book is well written to provide ease of understanding concepts. I am currently building a kayak from Nick's 1st book.
