You may be someone who likes to pit their wits against wild animals; testing your own strengths and the depth of your resources.Alternatively, you may find yourself in a situation where you are trying to survive and know there are predatory animals in the area. You will be faced with a decision; to fight or to run. Unfortunately, in a survival situation there is no guarantee that running will be enough. You may also not be able to avoid the fact that a predator would make a nice meal for you.Predatory animals actually come in all shapes and sizes. Although your first thought may be the big cats; there are some much smaller animals which can be a serious threat to your health.The key to survival in these situations is to know how to react when you are attacked; it is to know how to attack them and survive attacking a predatory animal. At worst you will have made them think twice about attacking you; at best you will have secured dinner for several nights!You will learn the following: Introduction to when, how and why you may find yourself needing to attack a predatory animal. This may seem extreme but attack is generally the best type of defense. 5 Lessons on how to prepare to attack; assuming you have the time. Unless you surprise an animal then you should be able to take a few minutes to prepare. Of course, much of this preparation can be carried out before you find yourself n the situation. 5 Lessons to help you attack, with survival and defeating the predator foremost in your mind. 5 additional tips to ensure you are physically and mentally prepared for the attack; whenever it happens.
