Secrets Of Mental Math: The Mathemagician's Guide To Lightning Calculation And Amazing Math Tricks

Synopsis

These simple math secrets and tricks will forever change how you look at the world of numbers. Secrets of Mental Math will have you thinking like a math genius in no time. Get ready to amaze your friends and yourself with incredible calculations you never thought you could master, as renowned “mathemagician” Arthur Benjamin shares his techniques for lightning-quick calculations and amazing number tricks. This book will teach you to do math in your head faster than you ever thought possible, dramatically improve your memory for numbers, and maybe for the first time make mathematics fun. Yes, even you can learn to do seemingly complex equations in your head; all you need to learn are a few tricks. You will be able to quickly multiply and divide triple digits, compute with fractions, and determine squares, cubes, and roots without blinking an eye. No matter what your age or current math ability, Secrets of Mental Math will allow you to perform fantastic feats of the mind effortlessly. This is the math they never taught you in school.

Customer Reviews

“A great introduction to the wonder of numbers, from two superb teachers.”

• Brian Greene, author of The Elegant Universe “A magical mystery tour of mental mathematics! Fascinating and fun.”

• Joseph Gallian, president of the Mathematical Association of America “The clearest, simplest, most entertaining, and best book yet on the

art of calculating in your head. • Martin Gardner, author of Mathematical Magic Show and Mathematical Carnival “This book can teach you mental math skills that will surprise you and your friends. Better, you will have fun and have valuable practical tools inside your head.” • Dr. Edward O. Thorp, mathematician and author of Beat the Dealer and Beat the Market

Arthur Benjamin is a professor of mathematics at Harvey Mudd College in Claremont, California. He is also a professional magician and performs his mixture of math and magic all over the world. Michael Shermer is host of the Caltech public lecture series, a contributing editor to and monthly columnist of Scientific American, the publisher of Skeptic magazine, and the author of several science books. He lives in Altadena, California.

good options to learn mental maths

This book is just way too much fun, seriously. My co-workers now call me "Rainman" thanks to my ability to perform a few of the tricks in the book. If you enjoy math, and want to learn a couple party tricks spend the \$10, you'll be glad you did

Honestly, I haven't read it yet. After the book arrived I showed it to my daughter and she commented that her friend at school loves math. I suggested that she loan it to him. She did, and a couple days later she told me that he said to tell her dad "Thank you", because he is almost finished reading it and really loves it. I said, "Tell him to keep it or share it with others. I will order another." I haven't ordered its replacement yet, but will do it soon.

Great refresher for me and my grandchild. Enjoyed the "shortcuts" especially the math tricks. Thank you!

This is the coolest book I've ever read! Love the tips and tricks for doing mental math and it really works, if you can remember everything. I struggle with memory issues so I refer to my cheat sheet but I'm sure once you've been doing this a while it would come naturally.

My wife is looking various book to teach our son and she feel this good fits a 7-8 years old boy.

Great book with a mental method to make readers appearing as a math genius. Can you mentally multiply 879×11 within 2-5 seconds? This book will help you to achieve that. Highly recommended.

These tricks should be taught in school--would have made math fun.
