How can I forget the snakes? Our boys are fascinated by "the yucky stuff" and this one fits the bill just fine, along with the spiders, bats and lizards. The 6 1/2 year old reads them to his yonder brother and they both love the pictures.

Got this as an end of school year presents for my sons K classroom and the teacher and students loved it!

I bought this book to replace a lost school book. The quality was great and delivery very prompt. Super satisfied.

My boys love this book. It teaches them basics about snakes!

My 8-year- old niece loves science and nature. This series of National Geographic books are her favorites, filed with fun facts and great photos. In her second grade class they ask that we read 20 minutes a night, and these books make that goal fun!

Lovely full color pages. Perfect.

It was as excepted

My grandson loved this book! He loves snakes. I have no idea why. Creepy!
