Methods Of Family Research

Synopsis

Following up on his successful initial foray into helping students better understand the research results they encounter, author Theodore N. Greenstein has revised and updated his popular *Methods of Family Research* to benefit a new generation of students and researchers! The Second Edition of *Methods of Family Research* differs from other research methods texts in a significant way. While traditional texts focus on teaching students how to produce research, this text teaches how to consume research. Written in a clear, concise style, this book introduces the basic concepts of social science research methods without getting bogged down in technical details. The text covers traditional quantitative methods, qualitative methods, and the mixed-method approach, and uses real-life examples to address issues family researchers deal with every day.

Customer Reviews

"The Greenstein book provides a review and a common ground for discussion of other class readings. I am unaware of any similar books and this is a welcome addition for my classes in family. It is unique and provides a quick review that students and I find helpful. I welcome a Second Edition." (Mary Ann Powell)"I think this book serves a real need for students at the beginning stages of family research." (Barbara D. Ames)"I've always thought that a real strength of this book is that it looks seriously at the issue of ethics and social concerns in the research enterprise." (Kory Floyd)"I agree with the author that making better consumers of research is an important and laudable goal for this audience. The 'new and improved' text is likely to fill a need within

human development and family relations departments." (Adam Davey)

Theodore N. Greenstein is a father, husband, teacher, author, and researcher. He is currently Associate Professor of Sociology at North Carolina State University. He received his Ph.D. in Sociology from Washington State University and has been teaching sociology of the family, research methods, and statistics since 1976. His research program focuses on the intersection of work and family. His publications on the division of household labor, marital stability, and the effects of maternal employment on child well-being have appeared in *Social Forces*, the *Journal of Marriage and Family*, the *Journal of Family Issues*, and the *Journal of Comparative Family Studies*. He is a member of the American Sociological Association, the Southern Sociological Society, the Council on Contemporary Families, and the National Council on Family Relations.

ok for school

This text provided a really simple way to understand the basics of the research field. It was a comfortable read and one that I continue to reference.

Good book for seeing how research works with family therapy. Only one of its kind for this type of information. It's a short and easy read as well!
