Customer Reviews

I bought this book to learn more about Cyberjaya which is located about an hours drive between KL and the airport. Unfortunately the information on this suburb where many global tech companies are located wasn't covered. However, many of the major questions I had regarding relocation and living near KL were answered and even some that I didn't anticipate. It is well worth having if you are relocating to KL.

As i said for the Singapore guidebook from the same series, this was a great guidebook for a tourist like me, although i had the same issue with the maps included: i would have loved a larger fold-in map. but even so, great one!
