Brenda M. Coppard, MS, OTR/L, Creighton University, Occupational Therapy Department, Omaha, NE; and Helene Lohman, MA, OTR/L, Creighton University, Occupational Therapy Department, Omaha, NE

My OT class just got into our splinting (for stroke and TBI rehab) unit, and this is our text. I made my first resting hand splint last Friday, using the detailed instructions from Coppard's book. All I can say is, "wow." This was truly a great resource. Not only does Coppard explain the theories behind splinting, but she also gives detailed instructions for creating patterns and splints themselves. Everything is top-notch for a student who is worrying his or her hair grey over positioning and

pressure-distribution. The book also includes forms for assessing your own splints, covering all the necessary elements and common mistakes made by beginning splint-makers. There are short quizzes at the end of each chapter, which are useful, and loads of good pictures. As a student, I highly recommend this guide.
