The Red Sea

Synopsis

The Red Sea is the closest tropical sea to Europe. It is almost an extension of the Mediterranean from which it is separated by the Isthmus of Suez. This proximity to the early civilisations of the Mediterranean have strongly affected the history of the Red Sea which has always progressed in parallel to that of the Old World. The Red Sea was frequented by the ancient Egyptians, Phoenicians, Greeks and Romans who left traces of their passing in shipwrecks that every now and then are rediscovered. The ships that have ploughed the waters of the Red Sea for millennia have had to deal with strong currents and high winds that have turned this sea into a graveyard of ships from every age. The result is a delight for divers who have always found in the sea an underwater Eldorado. The famous Austrian pioneer, Hans Hass, came here after World War II and took the first photographs of the Umbria and her 360,000 unexploded bombs using his legendary Robot. The Italians arrived in 1953 on the Formica in an expedition whose members counted names that have gone down in diving history: Vailati, Quilici, Cousteau... This book tells the story of the exploration of the Red Sea, especially underwater, taking both history and natural history into account. The reader is guided through the magical submerged gardens of the Sinai, on the adventurous discovery of unknown wrecks, on a search for the remains of the Precontinent II, to Cousteau's village, face to face with sharks, and to the beaches. This new title in the "Secrets of the Sea" series, contains dramatic underwater photography. --This text refers to an out of print or unavailable edition of this title.

Customer Reviews

Having recently scuba dived in the Red Sea, I wanted a quality coffee table book to remind me of the adventure and to share with friends and family. This is definitely THE coffee table book to have on the Red Sea. The photos are absolutely stunning, with heavy page weight and brilliant colors. The author has captured some of the most amazing images of underwater life. Bottom line: It's a beautiful book that I'm proud to have on my coffee table.

Dobilet and crew generously provide expanded insight into the stunning beauty of which we are part. Photography and subject commingle to effect a blooming in the heart. Such a bounty of wonder could not come our way without the assiduous application of craft and vision. I am particularly enamored of the tiny shrimp peering over the lip of a seemingly massive Gorgonian stump of a sea-anemone, like a cricket in a redwood tree.
