Customer Reviews

DeLorme has been directly responsible for many of the major technological advances made in the mapping industry over the past 30 years.

Excellent in every respect. One (minor) fault of almost all volumes of maps: centering / binding of some pages is awkward.

Whenever I anticipate spending long enough in an area to do some serious exploring of the region I get a Delorme gazetteer for the area. I find that roadmaps are okay if one is just passing through. But, as was the case when I knew I was going to spend several days in Connecticut, I got a gazetteer. This allowed me to find out-of-the-way places as well as backroads that took me to some quite picturesque places, including little streams and ponds, as well as some quaint little hamlets. I was able to get a sense of the local culture that would have been impossible otherwise. And as someone who enjoys hiking, I was able to find hiking trails that provided some great exercise and

wonderful scenery. Plus, because it's a topographical map you'll be able to anticipate the terrain you'll encounter whether your on foot or driving.
