All Stings Considered: First Aid And Medical Treatment Of Hawaii's Marine Injuries (Latitude 20 Books)

Synopsis

Does urinating on Portuguese man-of-war stings do any good? Will coral grow inside coral cuts? Why do so many marine cuts in Hawaii become infected? All Stings Considered answers these and many other questions about the injuries that can occur while working or playing in Hawaii's ocean waters. Covering far more than stings, this book's topics range from barracuda bites to sunburn; from ciguatera fish poisoning to swimmer's ear. This generously illustrated volume is the only medical guide that specifically addresses Hawaii's unique marine species. This book is for anyone who goes near or into the water ... or cares for those who do. It describes injury prevention and first aid in everyday language with descriptions and pictures for the layperson and more specialized information on each type of injury for the medical professional.

Customer Reviews

"Very good pictures and invaluable information. If you spend time in or around the ocean, you will want this book."

Susan Scott writes the "Ocean Watch" column for the Honolulu Star-Advertiser and has written eight books about nature in Hawaii. Her newspaper columns about Kālele generate more reader e-mail than all other subjects combined. Scott shares Johnson's fascination with these extraordinary birds and has followed his research for over three decades.

This was a good buy. I would have liked to have it sooner. But for the price it is good.

Absolutely the best book about treating marine injuries with up to date and professional information. This should be a must for anyone spending much time in the water--professionally or recreationally.
