It includes a DVD and instructions for 28 origami paper airplane projects." â "All Done Monkey blog

Michael G. LaFosse decided he would be an origami artist in 1971, after reading (and re-reading) a *Readers' Digest* article by Leland Stowe, about the amazing folded art of Japanese Master Akira Yoshizawa. Michael's uncle Norman had folded paper airplanes with him when Michael was a toddler, and his dad, Jerry LaFosse, was a photographer in the US Air Force. LaFosse burst onto the paper airplane scene in 1984 with his self-published pamphlet, "*Aero-gami: F-14 Tomcat Fighter*." A biologist by training, he went on to become one of the most celebrated natural history origami artists, making his own handmade papers and creating hundreds of designs now seen in exceptional exhibitions, and published in dozens of books, kits, and videos. Richard L. Alexander was caught up in the ultralight aviation craze in the mid 1980s, and built a fiberglass / foam / graphite / Kevlar composite, retractable gear, amphibious, canard airplane from a kit (the XTC Hydrolight, designed by Dan Diehl, of Jenks, OK). He met LaFosse in 1988, and together they have produced exhibitions and publications about paper art and origami. Alexander has worked with LaFosse full time since 2003, and since then has made all of the Origamido handmade paper.

Alexander also teaches and designs origami, while being responsible for photography, videography, commercial projects and managing the Origamido Studio gallery spaces and exhibitions.

Many years ago, after my 7 and 4-year-old sons and I took a paper plane workshop with Michael LaFosse during the first Charlotte, NC Origami Festival, I bought all of his VHS paper airplane instructionals, at \$25 EACH. We have had SO MUCH quality time/family fun with these planes over the years, and we haven't grown out of them! Here are all 3 of them combined into one DVD - best visual origami instruction EVER - for an unbelievably low price! The planes are the best ever - fly fantastically! - I've wasted my time and money investigating many other paper airplane books, and have never found the level of success or satisfaction with any others. The video makes it failproof. I collect origami books, and have come to appreciate good instruction - folds aren't always presented in learner-friendly ways. This book/dvd set is HIGHLY RECOMMENDED if you love origami and value clear, easy-to-follow diagrams, but Michael's video tutorials take these to the next fabulous level of origami instruction.

My son's favorite book. My son uses this book just about everyday. He loves watching the DVD and following the directions. He has made many paper airplanes. He is having lots of fun

Lots of challenging folds and great fliers

I liked this book because it came with a DVD of the author making EVERY plane in the book. Origami instructions can be confusing from one step to the next and the DVD makes it much more clear. The planes fly great if you fold them precisely and stay together. None of the planes in the book require any tools like scissors, tape, glue, etc. My son and I love it.

My 9 year old Grandson is learning Origami, and this is a great tool for him to practice.

I like to have books like this available for when the grand kids visit.

This was a very cool book for my 12 year old son. Had a lot of different planes- I had no idea there were so many kinds.

Seven year old son loves it!!
