It's been a while since I read a textbook for a class, so maybe things have changed everywhere. In my past, most textbooks were rather hard to get into, packed with technical terms and somewhat plodding. I find (am reading now) *Becoming a Helper* a densely packed, user-friendly textbook that provides lots of case examples to illustrate points. It will surely become a well-used reference as I progress in my counselor training. This is my first Corey and Corey book, but will certainly not be the last. For the neophyte counselor, or helper as they term it, this is a necessary opener.

This is my textbook for my Psychology class. It is well written and the things to do at the end of each chapter really help bring home the information shared in the chapter.

Very complete. This is a book I can see myself referring back to many times over the years.

This was a textbook required for my "Intro. to Human Services" course. I really enjoyed this book, and had I not rented it, I probably would have kept it. I found myself going back through and reading certain paragraphs as I felt I related to them so well. It's a great text for those looking to get into the Helping Profession and gives personal and professional insight. I personally felt it helped me better understand why I wanted to go into this field. I highly recommend this text and think it promotes discussion and reflection.

This book is helping a lot on understanding the concepts of life and the helper helping the clients, from among other subjects. Were on chapter 4 going into 5 now and so far my learning experience has been a lot.

This is a wonderful book for anyone who wants to become a counselor! From considering your personal reasons to ethics this book covers it all in a very easy to read and understand format.

Being in a BA program for Human Services for the last 3.5 years, I've read three or four Corey texts. In general, they write a good, comprehensive book, and this one is no different. This serves as an excellent entry point to many of the topics that should be addressed when entering the helping field, including ethical issues, internal conflict, boundaries with clients, and cultural understandings. That being said, I've been assigned it as a text in my 4th year and it is a bit late in my studies to use a

text such as this. Regardless, it has good information to offer and I recommend it.
