Jabbed: How The Vaccine Industry, Medical Establishment And Government Stick It To You And Your Family

Synopsis

The vaccine industry, medical establishment and government have convinced millions of people that vaccines are one of the greatest medical advancements in history. Consequently, believers believe in the salvational value of vaccines in much the same way that people of faith believe in the salvational value of religious sacraments. Germs are bad and vaccines are good. Period. Questioning the dominant paradigm results in shaming, scapegoating, and in some cases tainted reputations, lost careers or worse. Such an environment is not the domain of science; rather it's the breeding ground of tyranny and fascism. Corporate and personal profits from the burgeoning vaccine pie depend upon the larger-than-life, myth-based vaccine paradigm. Sociopaths inject this paradigm into medical journals, medical curricula, congressional hearings, regulatory policies, White House statements, executive orders, and finally into the minds of vaccine believers. Million dollar sociopathic propaganda campaigns ensure that vaccine believers unleash their wrath against the vaccine informed, effectively keeping The Herd immune to the truth and ready and willing to roll up their sleeves to any and all vaccines currently on the schedule and to those yet to come down the vaccine pipeline. In spite of and in part because of the propaganda, the number of vaccine informed individuals is increasing. The day is soon coming when consumer distrust of vaccine sociopaths will gut the vaccine industry. Don't expect the sociopaths to roll over, play dead, and sacrifice their multi-billion dollar generating machine, however. Human bodies are, after all, their ATMs. The waves of coercive and mandatory vaccination laws that are rolling out across the USA and beyond demonstrate that if sociopaths are denied voluntary access to our bodies, they will take them by force. The force of law. A vaccine informed public is the only thing that will have the power to stop them and to hold them accountable for their crimes. Jabbed exposes the vaccine paradigm, provides an accurate accounting of the sordid history of vaccinations, details conflicts of interest, warns against the unethical policies and practices of the American Academy of Pediatrics, shines light on the complicity of medical professionals, highlights the story of William Thompson, the CDC whistleblower, and celebrates the powerful role the documentary film Vaxxed is playing in exposing government fraud and awakening the public. In short, Jabbed informs and immunizes against three of the most dangerous epidemics in history: tyranny, greed, and corruption.

Book Information

Paperback: 370 pages

Publisher: CreateSpace Independent Publishing Platform (September 7, 2016)

Language: English

Customer Reviews

“This book is a must read especially if you still think vaccines are provably safe and effective!”
— Stephanie Seneff, PhD, senior research scientist at the MIT Computer Science and Artificial Intelligence Laboratory
“A brilliant book on the sordid history of infectious disease and vaccines. It confirms my own conclusions on this subject, in that no vaccine prevents any infectious disease and that every vaccine poses serious dangers to public health. A must-read for all ages.”
— Shiv Chopra, DVM, PhD, former senior scientific advisor on vaccinations for Health Canada --This text refers to the Hardcover edition.

“Two of my children • intelligent and caring individuals • have decided against careers in Medicine. They have done so because they would be required to risk multiple and repeated vaccinations, just to get through medical school. How many more of Brett Wilcox's 'vaccine informed' have made or will make this same choice? All those, I suggest, that in a similar position to my children, read Wilcox's direct, informed, cut-to-the-chase narrative. A new documentary jumps out of every chapter.”
— Andrew Wakefield, MB, BS, Director, Vaxxed: From Cover-up to Catastrophe, VaxxedTheMovie.com
“Brett Wilcox has done it again, this time taking on Big Pharma and the global vaccination program. This book is a must read especially if you still think vaccines are provably safe and effective! Toxic ingredients in vaccines work synergistically with glyphosate in food to damage children.”
— Stephanie Seneff, Ph.D., Senior Research Scientist at the MIT Computer Science and Artificial Intelligence Laboratory
Brett's passionate exposé empowers you to make decisions for yourself and your family from a place of truth rather than fear. I see it as required reading for parents and health care professionals willing to have their eyes opened.”
— Kathryn Azelia Hale, MD, MPH, FACOG,

Holistic OB/GYN, AbundantHealthLife.com About the Author Brett Wilcox is a Licensed Professional Counselor. Through Brett's work and research, he discovered that abusers at home, in industry, and in the government use the same tactics to gain and maintain control over others. In 2013, Brett authored *We Are Monsanto: Feeding the World, Lie After Lie, Book I*. In 2014, he and his 15-year old son, David, ran across the United States advocating for a GMO free USA. In 2015, Brett published his second book, *We Are Monsanto: Still Feeding the World, Lie After Lie, Book II*. While running across the country, Brett and his family met parents of autistic children. Some stated that their healthy children suffered vaccine reactions leading to their regression into autism. Shortly after finishing their run, Dr. William Thompson—the scientist now known as the CDC whistleblower—acknowledged that he and his colleagues had buried the link between vaccines and autism. These events compelled Brett to investigate the vaccine industry, which led to the incontrovertible conclusion that "the world's greatest scientific achievement is built upon fraud, greed, corruption, and tyranny. Brett blogs at RunningTheCountry.com.

This is my favorite quote from a member of the Pharma Aristocracy: "Forgive this personal comment, but I got called out at eight o'clock for an emergency call and my daughter-in-law delivered a son by C-section. Our first male heir in the line of the next generation, and I do not want that grandson to get a thimerosal containing vaccine until we know better what is going on. It will probably take a long time. In the meantime, and I know there are probably implications for this internationally, but in the meanwhile I think I want that grandson to only be given thimerosal-free vaccines." Dr. Dick Johnston, the meeting chairperson and Immunologist and Pediatrician for the University of Colorado School of Medicine and National Jewish Center for Immunology and Respiratory Medicine. King Dick made this announcement about the royal prince at the CDC Simpsonwood Conference. You can find this gem on page 154. King Dick has no problem with the monkey pus, mouse brain, toxic metals being jabbed into the peasant babies, but the royal family will not participate. I love the poke in the eye writing style. Tremendous research! Thanks, Mr. Wilcox!

I was excited to read an advance copy of this wonderful book by Brett Wilcox. With an abundance of source material, an engaging writing style, and the type of good old-fashioned common sense we used to find our top journalists, Wilcox has written a book that should be read by every person in America. Kent Heckenlively, J.D. Co-Author of *PLAGUE: One Scientist's Intrepid Search for the Truth*

About Human Retroviruses and Chronic Fatigue Syndrome (ME/CFS), Autism and Other Diseases
Author of upcoming book to be released on November 10, 2016, INOCULATED: How Science Lost Its Soul in Autism

Smart people ask questions. Smart people KNOW they must do the work; that they cannot rely on another-ANY other to make decisions for them or their children. THAT is where we have failed. We stopped being judicious. We have trusted too much. Government is corrupt. Corporations are corrupt. When a lie is the foundation of a pediatrician's practice, that "vaccines are the single best thing I can offer my patients," it makes it very difficult for even doctors to entertain the idea that THIS IS REAL... Vaccines can and do cause harm and even death in some children. Vaccination, to me looks like a cult religion where doctors are the prophets, and the injection is the sacrament. Those practicing "vaccine religion" worship at the altar of modern science and throw all Christian morality, along with our freedom, to the wind. Brett paints this picture while simultaneously destroying the very foundation of lies and corruption that vaccine proponents stand on. Brothers and Sisters in Christ, Parent asking questions who is willing to do the work: read this book. It is packed with information, but easy to digest for even one who is just bringing to investigate. It will leave you enlightened and I pray- convicted to fight for our children, for freedom and for truth. Prayerfully you arrive to that conviction BEFORE your children are harmed. xoxo

Easy to read and informational.

I can think of no better person than Brett Wilcox to take on the vaccine industry, following the model he had honed to take on the biotech industry in his earlier books, "We're Monsanto: Feeding the World Lie after Lie" and "We're Monsanto: still Feeding the World Lie after Lie." There's also no better person to unite the anti-GMO movement and the anti-vaccine movement into a single, powerful game-changing entity. His book arrives at an important time in history, coincident with the detection by Zen Honeycutt of Moms Across America of glyphosate contamination in the vaccines. This ominous discovery unites the two groups through the realization that vaccines are a delivery system for toxic chemicals used in GMO-based agriculture. Brett Wilcox has a knack for presenting in easy-to-understand language the manipulative tactics used by the chemical industry to lead to irrational fears that serve to maintain vaccination compliance by the majority of the population. This quote from his book is a good example of his straight talk: "Irrational fear of infectious disease + Irrational belief that vaccines safely prevent infectious disease = Vaccine compliance." If you're not

one of the parents of a severely vaccine-injured child, it's easy to accept the belief system and stay in a comfort zone where you trust what your doctor says and does. But please take the time to read Brett's book, and then rethink your views about vaccines. It will be a wake-up call. Brett Wilcox is not one to mince words. For example, he aptly refers to those who manufacture, administer, and promote vaccines as "vaccine sociopaths." Brett wrote: "Free and open access to accurate information is the biggest threat vaccine sociopaths have ever faced." He believes, and I agree, that this highly significant technological achievement is going to finally take down the vaccine industry and expose the truth about vaccines. Science can only be suppressed for as long as people remain ignorant. This book is a great achievement that could not have come at a better time. The writing style is entertaining and engaging. It's very accessible to those without a deep background in science and biology. And it's compelling. Please buy this book and share it widely!
