Review from previous edition: "an excellent source book" --Times Higher Education Supplement "the most comprehensive dictionary of philosophy in English" --Times Literary Supplement

Simon Blackburn is one of the UK's leading twenty-first century philosophers. He retired as professor of philosophy at the University of Cambridge in 2011 and is now Collegial Professor at the New College of the Humanities. He remains a distinguished research professor of philosophy at the

University of North Carolina at Chapel Hill. He is also a Fellow of Trinity College, Cambridge. He was previously a Fellow of Pembroke College, Oxford and has taught full-time at the University of North Carolina as an Edna J. Koury Professor.

I bought this for a Logic and Critical Reasoning class I'm taking. I" surprised that many of the terms I needed to reference were not found here. I hope this will become more useful later...

Useful source for brief lucid summaries and definitions. The Stanford site is great when you have the time and interest. Sometimes you are simply trying to clarify a sentence.

Exactly what I wanted for my college Philosophy courses. I still love a paperback size dictionary and when the prof. has a "no electronic" ban then boom it comes in really handy. I used it and it has way more than my last philosophy dictionary (a total failure)

This book is excellent and thorough!
